

# Graduation project documentation

**Project Title:** Healthcare Analytics for supporting Decision Making

**Course/Track:** Microsoft Power Bi Engineer

**Team Members:**

1. Asaad El-Saadany Badir Abdel Karim
2. Reda Ibrahim Al-Zaki Mohamed
3. Ahmed Fathy Mahmoud Al-Adl
4. Omnia Abdel Aziz Ibrahim
5. Ghada Khader Abu Bakr
6. Amira Ashraf Abdel Basset Saeed Al-Gamal

**Group code:** NEXT22 \_ DKH1 \_ DAT2 \_ G1e

## **1. Project Information**

- **Project Title:** Healthcare Analytics for supporting Decision Making
- **Course/Track:** Microsoft Power Bi Engineer
- **Team Members:**
  - 7. Asaad El-Saadany Badir Abdel Karim
  - 8. Reda Ibrahim Al-Zaki Mohamed
  - 9. Ahmed Fathy Mahmoud Al-Adl
  - 10. Omnia Abdel Aziz Ibrahim
  - 11. Ghada Khader Abu Bakr
  - 12. Amira Ashraf Abdel Basset Saeed Al-Gamal

## **2 Project Overview**

- **Objective:**

The objective of this project is to develop a healthcare reporting and analytics dashboard that provides key health indicators such as new pregnancies, newborns, heart disease, diabetes cases, and other critical health data, categorized by city. The goal is to provide decision-makers with valuable insights into health trends for better resource allocation and policy planning.

- **Scope of Work:**

The project involves designing and implementing a dashboard using real-time data from healthcare facilities across multiple cities. Data on pregnancies, births, heart diseases, diabetes, and other relevant health metrics will be collected, processed, and visualized. This system will also include trend analysis, geographical data mapping, and statistical reports.

- **Expected Outcomes:**

The project will produce a fully functioning, user-friendly dashboard that offers interactive data visualizations of healthcare metrics. This will help healthcare providers and policymakers to identify trends, track health outcomes, and make data-driven decisions. Expected outcomes include:

- Reduction in manual reporting efforts

- Real-time health tracking by city
- Enhanced health management and resource distribution

### **3 Problem Statement**

Managing health outcomes and trends across multiple cities is challenging without centralized, real-time data reporting systems. This leads to inefficiencies in healthcare resource allocation, delayed responses to emerging health concerns, and an inability to identify trends quickly.

### **4 Proposed Solution**

- **Technologies Used:**

Python, SQL, Tableau/Power BI, Pandas, Matplotlib/Seaborn,

- **System Architecture:**

The system will consist of a data collection layer, which receives input from city health departments. This data will be processed and stored in a central database. A real-time analytics engine will compute metrics, and the front-end dashboard will display visualizations using interactive charts and maps.

### **5 Resources Needed**

- Hardware/Software:
  - Data visualization software (e.g., Tableau, Power BI)
  - Analytical tools (Python, Jupyter Notebook)

### **6 Approval**

- Instructor/Advisor: Ahmed Alaa
- Signature: Ahmed Alaa

**Data Analysis**

Data analysis is the process of collecting, cleaning, transforming, and modeling data with the goal of discovering useful information, informing conclusions, and supporting decision-making. It's the backbone of many fields, from business and science to healthcare and government.

## Why is Data Analysis Important?

- **Informed Decision Making:** Data analysis provides the insights needed to make data-driven decisions rather than relying on intuition or guesswork.
- **Problem Solving:** By identifying patterns and trends in data, analysts can uncover the root causes of problems and develop effective solutions.
- **Innovation:** Data analysis can reveal new opportunities and drive innovation.
- **Efficiency:** By optimizing processes and resource allocation, data analysis can improve efficiency and reduce costs.
- **Competitive Advantage:** Organizations that can effectively leverage their data are better positioned to outperform their competitors.

## Types of Data Analysis

- **Descriptive Analysis:** Summarizes historical data to gain insights into what has happened. This includes calculating measures of central tendency (mean, median, mode) and dispersion (range, variance, standard deviation).
- **Diagnostic Analysis:** Investigates the causes of a particular event or outcome. It involves techniques such as correlation analysis and root cause analysis.
- **Predictive Analysis:** Uses historical data to forecast future trends and outcomes. Techniques include regression analysis, time series analysis, and machine learning.
- **Prescriptive Analysis:** Recommends actions to take based on the insights gained from predictive analysis. It involves optimization techniques and simulation modeling.

## Key Tools for Data Analysis

- **Power BI:** A popular business analytics service that provides interactive visualizations and business intelligence capabilities.
- **Python:** A versatile programming language with a rich ecosystem of data science libraries such as Pandas, NumPy, and Scikit-learn.
- **R:** Another powerful language for statistical computing and graphics.
- **SQL:** Used for managing and manipulating relational databases.
- **Tableau:** A data visualization tool that allows users to create interactive dashboards.

## Features of Power BI

- **Interactive Visualizations:** Create engaging and customizable visualizations to explore data.
- **Data Connectivity:** Connect to a wide variety of data sources, including Excel, SQL Server, and cloud-based services.
- **Natural Language Queries:** Ask questions about your data in plain language.
- **Collaboration:** Share insights and reports with colleagues.
- **Mobile Accessibility:** Access your dashboards and reports on the go.

## Steps in the Data Analysis Process

1. **Data Collection:** Gather relevant data from various sources.
2. **Data Cleaning:** Ensure data is accurate, complete, and consistent.
3. **Data Exploration:** Explore the data to identify patterns and anomalies.
4. **Data Modeling:** Create statistical models to represent the relationships between variables.
5. **Data Visualization:** Create visual representations of the data to communicate findings effectively.
6. **Interpretation:** Draw conclusions based on the analysis and communicate the results.

# **Improving Maternal and Child Health in Dakahlia Governorate**

## **A Data-Driven Approach**

This study aims to analyze a comprehensive dataset of maternal and child health records from various health facilities in Dakahlia Governorate, Egypt. By leveraging the power of data analytics, we seek to identify trends, patterns, and disparities in healthcare utilization and outcomes. The findings of this study will inform evidence-based decision-making and contribute to the improvement of maternal and child health services in the region.

Data was collected from [mention the specific departments] and includes information on maternal health, pregnancy outcomes, newborn health, and child immunization. The data was cleaned and prepared using Python, and subsequently visualized and analyzed using Power BI. This analysis will help answer critical questions such as:

- What are the most common risk factors for adverse pregnancy outcomes?
- How effective are immunization programs in the region?
- Are there geographic disparities in healthcare access and quality?

By answering these questions, we can identify areas for targeted interventions and resource allocation.

## Sample Methodology Section

**Data Collection and Preparation** Data was collected from the Health Directorate of Dakahlia Governorate. The dataset comprised multiple files, each containing information on different aspects of maternal and child health. These files were initially in a raw format and required significant cleaning and preprocessing. Using Python, the data was standardized, missing values were handled, and variables were translated into English for analysis.

Table: DATA (72 rows)

# Building Upon Spatial Relationships

Linking healthcare data to geographic locations provides invaluable insights into the distribution of health services and outcomes. By overlaying health data with geographic information, we can uncover hidden patterns and identify areas that require additional support.

## Understanding the Data

The provided dataset offers a rich tapestry of information related to maternal and child health in Dakahlia Governorate. This data, collected from various healthcare facilities, provides a comprehensive overview of the healthcare services provided, the health status of pregnant women, and the outcomes of pregnancies and births.

## Key Data Elements

The dataset encompasses a wide range of variables, including:

- **Patient History:** Detailed medical history of mothers, including chronic diseases, previous pregnancies, and birth outcomes.
- **Laboratory Tests:** Results of routine blood and urine tests to assess maternal and fetal health.
- **Pregnancy Complications:** Information on common pregnancy complications such as hypertension, gestational diabetes, and preterm birth.
- **Infant Health:** Birth weight, length, feeding practices, immunization status, and common infant health problems.

## Patient History

- **Chronic Diseases:** Information on pre-existing health conditions of the mother, such as diabetes, hypertension, heart disease, or respiratory illnesses.
- **Previous Pregnancies:** Details about prior pregnancies, including gestational age, birth weight, and any complications.
- **Family History:** Information on the health status of the mother's family members, especially regarding genetic conditions or pregnancy-related issues.

## Laboratory Tests

- **Hemoglobin:** To assess the risk of anemia, which can affect both mother and fetus.
- **Blood Sugar:** To screen for gestational diabetes, a common pregnancy complication.

- **Urine Protein:** To detect preeclampsia, a serious condition characterized by high blood pressure and protein in the urine.
- **Other tests:** May include thyroid function tests, Rh factor, and sexually transmitted infection screening.

### **Pregnancy Complications**

- **Hypertension:** Includes preeclampsia and eclampsia, which can pose significant risks to both mother and fetus.
- **Gestational Diabetes:** A type of diabetes that develops during pregnancy.
- **Preterm Birth:** Delivery before 37 weeks of gestation.
- **Preeclampsia:** A condition characterized by high blood pressure and protein in the urine.
- **Other complications:** May include anemia, infections, and fetal growth restriction.

### **Infant Health**

- **Birth Weight:** A key indicator of infant health, with low birth weight being associated with increased risk of complications.
- **Length:** Measures the infant's physical growth and development.
- **Feeding Practices:** Information on breastfeeding, complementary feeding, and any challenges encountered.
- **Immunization:** Records of vaccinations received to protect the infant from preventable diseases.
- **Health Problems:** Information on common infant health issues, such as jaundice, birth defects, and respiratory infections.

**Data Columns and their meanings:** Refer to the appendix to their meanings, translations.

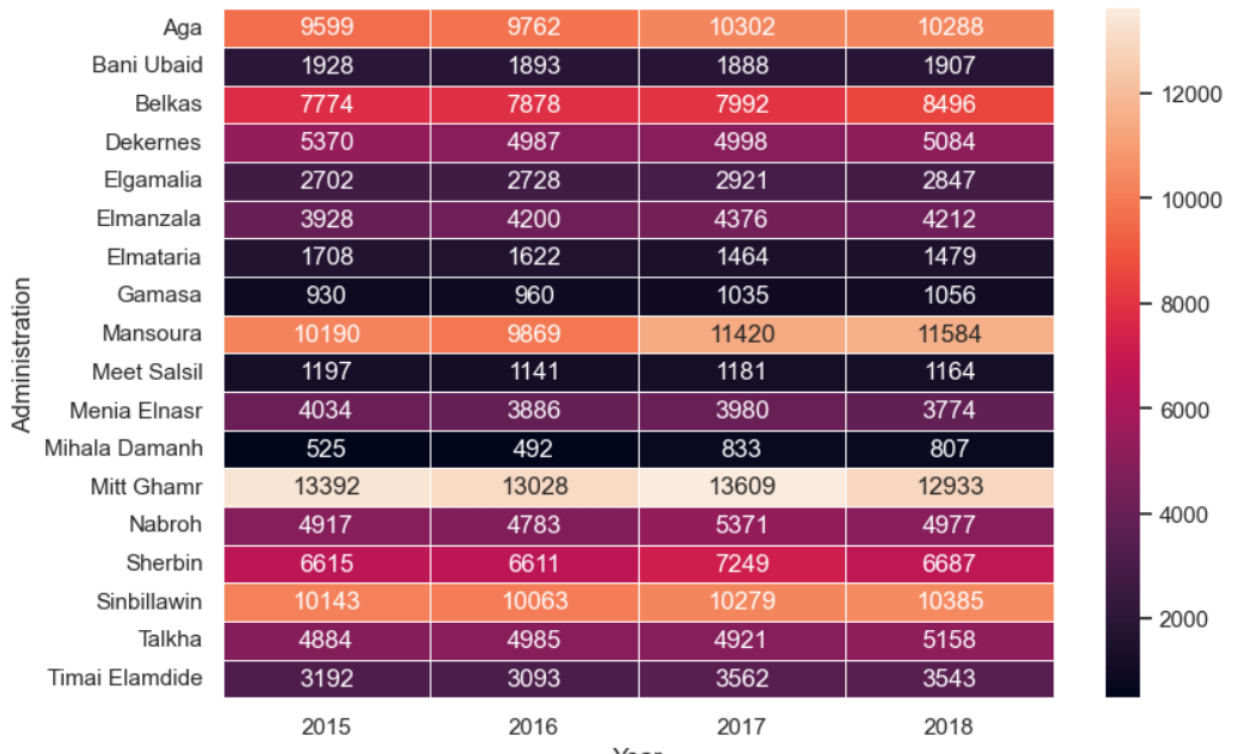

**Data Analysis** The cleaned data was imported into Power BI for visualization and analysis. Descriptive statistics were calculated to summarize the data, and various visualizations, such as bar charts, line graphs, and maps, were created to explore relationships and trends. Geographic information was incorporated to identify spatial patterns in healthcare utilization and outcomes.

## Appendix: Data Dictionary and Translation

The following tables provide a detailed description of each column in the dataset, including the original Arabic name, the English translation used for analysis in Power BI, and a brief explanation of the data contained within.

Column	Meaning
administration	administration
Newpregnant	New pregnant
Mother_tuberculosis	Mother's tuberculosis
family_tuberculosis	Family's tuberculosis
Caesarean	Caesarean
pregnancy1	first pregnancy
pregnancy2_3	Second or third pregnancy
pregnancy4_more	Fourth pregnancy and more
Abortion1	Abortion once
Abortion_more	Abortion more than once
Born_alive	Born alive
babydead	The baby is dead
childDead_7d	Death of a child less than 7 days
Bloodpressure_above	Blood pressure 140/90 and above
Bloodpressure_less	Blood pressure is less than 140/90
Thyroid_gland_hypertrophy	Thyroid gland hypertrophy
No_Thyroid_gland_hypertrophy	No Thyroid gland hypertrophy
Heartcases	Heart cases
Chestcases	Chest cases
Polyethylenecases	Polyethylene cases
Natural	natural
Hemoglobin9less	Hemoglobin less than 9 g
Hemoglobin9to11	Hemoglobin from 9 to less than 11 g
Hemoglobin11more	Hemoglobin 11 g or more
NegativeReese	Negative Reese
PositiveReese	Positive Reese
negativeWazerman	negative Wazerman
positiveWazerman	positive Wazerman
Negativesugar	Negative sugar
positivesugar	positive Sugar
Negativealbumin	Negative albumin
Positivealbumin	Positive albumin
Refuse_vaccinate	Refuses to vaccinate
Approve_vaccination	Approved vaccination
Vaccination_tetanus1	Vaccination against tetanus dose 1
Vaccination_tetanus2	Vaccination against tetanus dose 2
Dangerous_pregnancies	Dangerous pregnancies

Iron_Folic	Iron + Folic
Totalpregnant	Total pregnant women
natural_increaseweight	Increase natural weight
Increase_weight	Increase the weight of the natural
Bloodpressure_less140	Blood pressure is less than 140/90
Bloodpressure_above140	Blood pressure of 140/90 and above
legTumor	Tumor of the legs
no_legtumor	no leg tumor
Heartdiseases	Heart diseases
chestdiseases	chest diseases
Polycysticdiseases	Polycystic diseases
Other diseases	Other diseases
checkNormal	check Normal
Hemoglobinless9	Hemoglobin less than 9 g
Hemoglobin9to11	Hemoglobin from 9 to less than 11 g
Hemoglobin11more	Hemoglobin of 11 g or more
Negativesugar	Negative sugar
PositiveSugar	Positive Sugar
Negativealbumin	Negative albumin
Positivealbumin	Positive albumin
Homevisits	Home visits
Tetanus_vaccinated1	Tetanus vaccinated first dose
Tetanus_vaccinated2	Tetanus vaccinated second dose

Management	الادارة
New pregnant	جملة حوامل جدد
Drain for the mother	درن للأم
Drain for the family	درن للأسرة
Caesarean	قيصرية
first pregnancy	حمل بكرية
Second or third pregnancy	حمل ثانى أو ثالث
Fourth pregnancy and more	حمل رابع فأكثر
Abortion once	إجهاض مرة واحدة
Abortion more than once	إجهاض أكثر من مرة
Born alive	مولود حي
The baby is dead	مولود ميت
Death of a child less than 7 days	وفيات المواليد فى عمر أقل من ٧ أيام
Blood pressure 140/90 and above	ضغط دم ٩٠ / ١٤٠ فأكثر
Blood pressure is less than 140/90	ضغط دم أقل من ٩٠ / ١٤٠
Thyroid gland hypertrophy	تضخم غدة درقية
No Thyroid gland hypertrophy	لا تضخم غدة درقية
Heart cases	حالات قلبية
Chest cases	حالات صدرية
Polyethylene cases	حالات جهاز بولى
natural	طبيعى
Hemoglobin less than 9 g	هيموجلوبين اقل من ٩ جم
Hemoglobin from 9 to less than 11 g	هيموجلوبين من ٩ الى اقل من ١١ جم
Hemoglobin 11 g or more	هيموجلوبين ١١ جم فأكثر
Negative Reese	ريزس سلبى
Positive Reese	ريزس ايجابى
negative Wazerman	وازرمان سلبى
positive Wazerman	وازرمان ايجابى
Negative sugar	سكر سلبى
positive Sugar	سكر ايجابى
Negative albumin	زالال سلبى
Positive albumin	زالال ايجابى
Refuses to vaccinate	حالة ممنعة التطعيم
Approved vaccination	حالة غير ممنعة التطعيم
Vaccination against tetanus dose 1	تطعيم ضدالتيتانوس جرعة ١
Vaccination against tetanus dose 2	تطعيم ضدالتيتانوس جرعة ٢
Dangerous pregnancies	حالات الحمل الخطر
Iron + Folic	حديد+فوليك
Total pregnant women	جملة الحوامل المترددات
Increase natural weight	زيادة وزن طبيعية
Increase the weight of the natural	زيادة وزن غير طبيعية
Blood pressure is less than 140/90	ضغط دم أقل من ٩٠ / ١٤٠
Blood pressure of 140/90 and above	ضغط دم من ٩٠ / ١٤٠ فأكثر
Tumor of the legs	نعم ورم الساقين
no leg tumor	لا ورم الساقين
Heart diseases	امراض قلبية
chest diseases	امراض صدرية
Polycystic diseases	امراض جهاز بولى
Other diseases	امراض اخرى

<b>Normal check</b>	الفحص طبيعى
Hemoglobin less than 9 g	هيموجلوبين اقل من ٩ جم
Hemoglobin from 9 to less than 11 g	هيموجلوبين من ٩ الى اقل من ١١ جم
Hemoglobin of 11 g or more	هيموجلوبين من ١١ جم فأكثر
Negative sugar	سكر سلبى
Positive Sugar	سكر ايجابى
Negative albumin	زلال سلبى
Positive albumin	زلال ايجابى
Home visits	جملة الزيارات المنزلية
Tetanus vaccinated first dose	تطعيم تيتانوس جرعة أولى
Tetanus vaccinated second dose	تطعيم تيتانوس جرعة ثانية
Risk Pregnancy	حمل خطر
Pregnancy complications (maternal mortality during pregnancy)	مضاعفات الحمل (وفيات الأمهات أثناء الحمل)
Total births	جملة الولادات
The duration of the pregnancy is less than 37 weeks	مدة الحمل اقل من ٣٧ اسبوع
Birth	ولادة
Miscarriage	إجهاض
Birth on hospital	الولادة بالمستشفى
Birth on Central Care	الولادة بالرعاية
Birth on the clinic	الولادة بالعيادة
Birth at home	الولادة بالمنزل
Birth by a doctor	القائم بالولادة طبيب
Birth by nurse / childbirth	القائم بالولادة ممرضة/مولدة
Birth in another way	القائم بالولادة أخرى
Birth is Caesarean	الولادة قيصرية
Birth is natural	ولادة طبيعية
Other type of birth	نوع الولادة أخرى
Complications of birth( bleeding)	مضاعفات الولادة نزيف
Complications of birth placenta retention	مضاعفات الولادة إحتباس مشيمة
Other birth complications	مضاعفات الولادة أخرى
Referral of the child	احالة المولود
Non-referral of the child	عدم احالة المولود
Vitamin A	فيتامين أ
The child is male	المولود ذكر
The child is female	المولود أنثى
The baby is alive	المولود حى
The baby is dead	المولود ميت
The weight of the baby is less than 2500 gm	وزن المولود أقل من ٢٥٠٠ جرام
The weight of the baby is 2500 gm. and more	وزن المولود ٢٥٠٠ جرام وأكثر
The length of the baby is less than 50 cm	طول المولود أقل من ٥٠ سم
The length of the baby is 50 cm or more	طول المولود ٥٠ سم فأكثر
Yellow disease	صفراء
Birth Defect	تشوهات خلقية
Breastfeeding within an hour	الرضاعة خلال ساعة
Breastfeeding within 6 hours	الرضاعة خلال ٦ ساعات
Breastfeeding more than 6 hours	الرضاعة أكثر من ٦ ساعات
Total referrals	جملة المحالين
Total maternal visits	إجمالى زيارات النفاس
Total maternal mortality	إجمالى وفيات الأمهات أثناء الولادة والنفاس
New kids less than 15 days first visit	اطفال جدد أقل من ١٥ يوم اول زيارة
	مدد اخرى

Other extensions	حواس
senses	حساسية
sensitivity	تأخر فى النمو العقلى
Delayed mental development	امراض وراثية
Genetic diseases	استخدام زجاجة ارضاع
	استخدام لهاية
Use a bottle of lactation	جملة مترددين شهر ٢
Use the hiatus	ناقص الوزن شهر ٢
Total regulars 2 months	وزن طبيعى شهر ٢
Minus weight 2 month	زائد الوزن شهر ٢
Normal weight 2 Month	طول طبيعى شهر ٢
Plus weight 2 month	بداية تقزم شهر ٢
<b>Normal length 2 month</b>	تقزم شديد شهر ٢
Start dwarf (Month 2)	رضاعة طبيعية مطلقة شهر ٢
Extreme stunting (2 months)	رضاعة طبيعية مع مكملات شهر ٢
Normal breastfeeding (2 months)	رضاعة غير طبيعية شهر ٢
Breastfeeding with Supplement (Month 2)	تطعيم مستكمل شهر ٢
Unnatural breastfeeding (2 months)	تطعيم غير مستكمل شهر ٢
Complete vaccination (2 months)	جملة مترددين
Incomplete vaccination (2 months)	ناقص الوزن شهر ٤
Total of regulars (4 month)	طبيعى شهر ٤
Minus Weight (Month 4)	زائد الوزن شهر ٤
Natural (Month 4)	طول طبيعى شهر ٤
Plus Weight (Month 4)	بداية تقزم شهر ٤
Natural length (4 months)	تقزم شديد شهر ٤
Beginning dwarf (Month 4)	رضاعة طبيعية مطلقة شهر ٤
Extreme stunting (4 months)	رضاعة طبيعية مع مكملات شهر ٤
Absolute breastfeeding (4 months)	رضاعة غير طبيعية شهر ٤
Breastfeeding with supplements (4 month)	تطعيم مستكمل شهر ٤
Unnatural breastfeeding (4 months)	تطعيم غير مستكمل شهر ٤
Complete vaccination (4 months)	جملة الاطفال المترددين ٦ شهر
Incomplete vaccination (4 months)	ناقص الوزن ٦ شهر
Children (6 months)	وزن طبيعى ٦ شهر
Minus weight (6 months)	زائد الوزن ٦ شهر
Natural Weight (6 months)	طول طبيعى ٦ شهر
Plus weight (6 months)	بداية تقزم ٦ شهر
Natural length (6 months)	تقزم شديد ٦ شهر
Start dwarf (6 months)	رضاعة طبيعية مطلقة ٦ شهر
Extreme stunting (6 months)	رضاعة طبيعية مع مكملات ٦ شهر
Absolute breastfeeding (6 months)	رضاعة غير طبيعية ٦ شهر
Breastfeeding with supplements (6 months)	الحالة تطعيمية مستكملة ٦ شهر
Unnatural breastfeeding (6 months)	الحالة تطعيمية غير مستكملة ٦ شهر
Complete vaccination (6 months)	جملة مترددين شهر ٩
Incomplete vaccination (6 months)	ناقص الوزن شهر ٩
Total regulars (Month 9)	وزن طبيعى شهر ٩
Minus weight (month 9)	زائد الوزن شهر ٩
Natural Weight (Month 9)	طول طبيعى شهر ٩
Plus Weight (Month 9)	بداية تقزم شهر ٩
Natural Length (Month 9)	تقزم شديد شهر ٩
Beginning dwarf (month 9)	رضاعة طبيعية شهر ٩
Extreme stunting (9 months)	رضاعة غير طبيعية شهر ٩

Natural Breastfeeding (9 months)	يوجد أغذية أخرى شهر ٩
Unnatural Breastfeeding (9 months)	لا يوجد أغذية أخرى شهر ٩
Other Food (Month 9)	الحالة تطعيمية مستكملة شهر ٩
No other food (Month 9)	الحالة تطعيمية غير مستكملة شهر ٩
Vaccination Completed (Month 9)	جملة مترددين شهر ١٢
Vaccination incomplete (Month 9)	ناقص الوزن شهر ١٢
Total Regulars (12 months)	وزن طبيعي شهر ١٢
Minus weight (12 months)	زائد الوزن شهر ١٢
Natural Weight (12 months)	طول طبيعي شهر ١٢
Plus weight (12 months)	بداية تقزم شهر ١٢
Natural Length (Months 12)	تقزم شديد شهر ١٢
Beginning of dwarfism (12 months)	رضاعة طبيعية نعم شهر ١٢
Extreme stunting (12 months)	رضاعة طبيعية لا شهر ١٢
Natural Breastfeeding (12 months)	أغذية أخرى نعم شهر ١٢
Unnatural breastfeeding (12 months)	أغذية أخرى لا شهر ١٢
Other Food (12 months)	تطعيم مستكمل شهر ١٢
No other food (12 months)	تطعيم غير مستكمل شهر ١٢
Complete vaccination (12 months)	جملة المترددين شهر ١٨
Incomplete vaccination (12 months)	ناقص الوزن شهر ١٨
Total regulars (18 months)	وزن طبيعي شهر ١٨
Minus weight (months 18)	زائد الوزن شهر ١٨
Natural Weight (18 months)	طول طبيعي شهر ١٨
Plus weight (18 months)	بداية تقزم شهر ١٨
Natural Length (18 months)	تقزم شديد شهر ١٨
Start dwarf (18 months)	رضاعة طبيعية نعم شهر ١٨
Extreme stunting (18 months)	رضاعة طبيعية لا شهر ١٨
Natural Breastfeeding (18 months)	أغذية أخرى نعم شهر ١٨
Unnatural breastfeeding (18 months)	أغذية أخرى لا شهر ١٨
Other Food (18 months)	تطعيم مستكمل شهر ١٨
No other food (18 months)	تطعيم غير مستكمل شهر ١٨
Complete vaccination (18 months)	جملة مترددين شهر ٢٤
Incomplete vaccination (18 months)	ناقص الوزن شهر ٢٤
Total of regulars (Month 24)	وزن طبيعي شهر ٢٤
Minus weight (24 months)	زائد الوزن شهر ٢٤
Natural Weight (Month 24)	طول طبيعي شهر ٢٤
Plus weight (24 months)	بداية تقزم شهر ٢٤
Natural length (24 months)	تقزم شديد شهر ٢٤
The beginning of dwarfism (24 months)	رضاعة طبيعية شهر ٢٤
Extreme stunting (24 months)	رضاعة غير طبيعية نعم شهر ٢٤
Natural Breastfeeding (24 months)	أغذية أخرى شهر ٢٤
Unnatural breastfeeding Yes (24 months)	لا أغذية أخرى شهر ٢٤
Other Foods (Month 24)	الحالة التطعيمية مستكمل شهر ٢٤
No Other Foods (Month 24)	الحالة التطعيمية غير مستكمل شهر ٢٤
Complete vaccination (24 months)	هيموجلوبين أقل من ١١ جرام شهر ٢٤
Incomplete vaccination (24 months)	هيموجلوبين ١١ جرام فاكثر شهر ٢٤
Hemoglobin less than 11 gm (24 months)	جملة مترددين شهر ٣٦
Hemoglobin 11 gm more (24 months)	ناقص الوزن شهر ٣٦
Total of regulars (Month 24)	وزن طبيعي شهر ٣٦
Minus weight (36 months)	زائد الوزن شهر ٣٦
